ABOUT PeCo ANPR

The mobile number plate recognition PeCo ANPR (Automatic Number Plate Recognition) provides answers to the following questions: Where do your customers come from? What influence do national advertising measures or changes in the product/service offering have on the customer's catchment area? How do seasonal effects such as holidays and weather influence the number and origin of cars? PeCo ANPR is reliable license plate recognition and traffic counting in one, even on wet roads, wind and fog. PeCo ANPR is a joint development with our Swiss partner company SWISSTRAFFIC - the experts for mobility, security and signaling planning. The SWISSTRAFFIC camera captures the number plates and only transmits the first three characters to our PeCo Cloud.
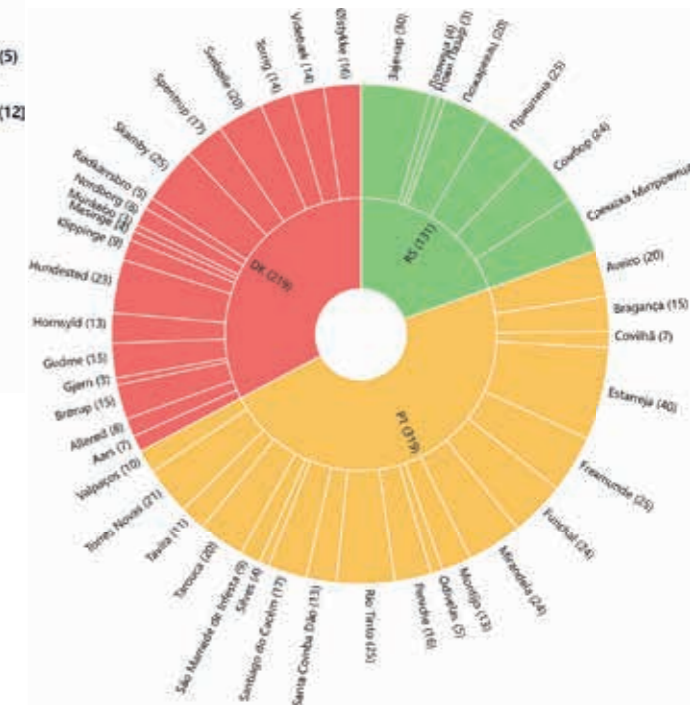

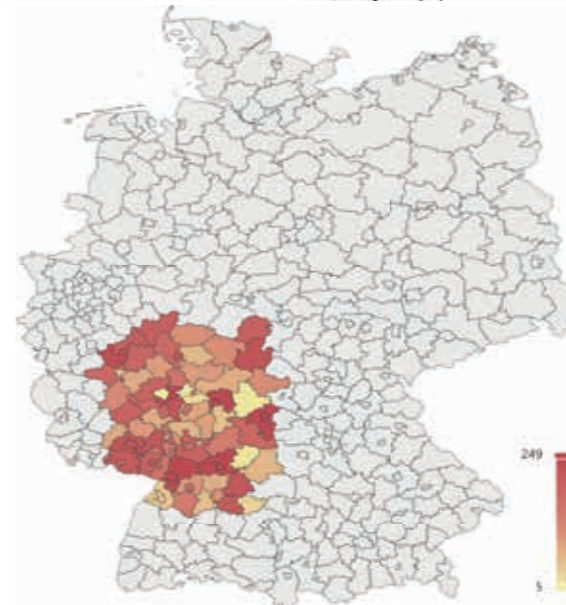

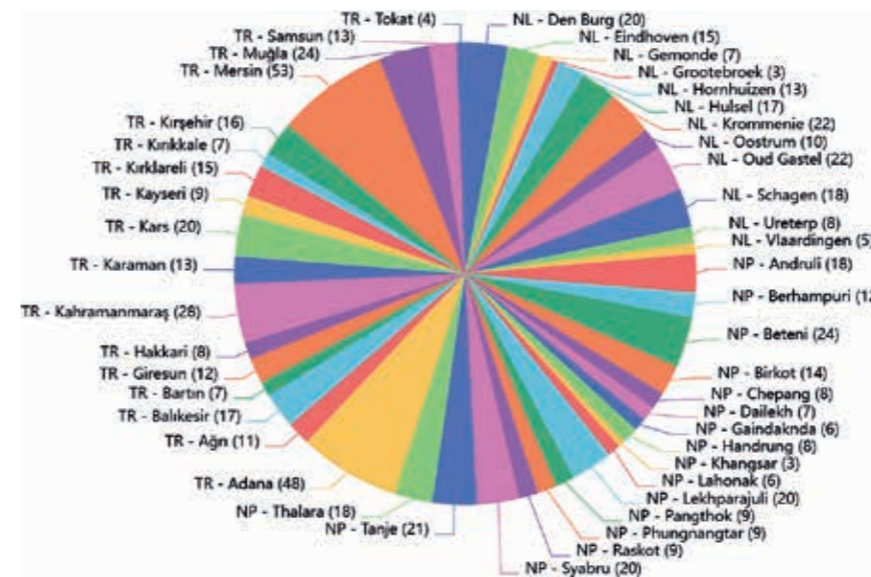

FEATURES PeCo ANPR

✓ Precise traffic flow detection thanks to the use of the latest generation of intelligent number plate detection cameras with high accuracy.

✓ Solution from a single source compliant with the new EU data protection guidelines.

✓ Vehicles are assigned to a country based on their registration number, District assigned to a municipality (all EU countries + Switzerland (CH)).

✓ The camera also recognizes the number of cars.

APPLICATION AREAS PeCo ANPR

🚦 Traffic

🚦 Inner cities

🚦 Retail parks / shopping centers / hardware stores
